Certificate of Product Approval

Certificate Number: 1629b Issue: 01

Inova Gates Limited

76 Derrynoid Road
Draperstown
Magherafelt
Northern Ireland
BT45 7DW

is authorised to use the LPCB mark in association with the product(s) listed in this certificate and appendix having complied with the requirements of the standard(s) detailed below:

Products

Inova
security gates

Standards

LPS 1175: Issue 8
Requirements and testing procedures for the LPCB certification and listing of intruder resistant building components, strongpoints, security enclosures and free-standing barriers

This certificate and appendix is maintained and held in force through regular surveillance activities

Signed for BRE Global Ltd.	Chris Hunt Verifier	26 September 2022 Date of Issue	26 September 2022 Date of First Issue

Appendix to Certificate No: 1629b

Issue: 01

Inova Gates Limited

Security Gates

Product Name	Model	Type	Minimum Height (m)	Maximum Height (m)	Minimum Width (m)	Maximum Width (m)	Compatible Locking Device	Security Rating	LPCB Ref No.
Inova	200	Automatic cantilever sliding gate	2.0	2.4	4.0	8.0	Secured using integral motor	B3 (SR2)	1629b/01
	280		2.0	3.0	6.0	12.0			1629b/02
	400		2.0	2.4	12.0	16.0			1629b/03
	400 HSS		2.0	6.0	6.0	10.0			1629b/04

Compatible Drive Mechanism, Locking and Operating Devices

Drive Mechanism and Locking Device	Compatible Operating Devices	
	External	Internal
Integral motor	Access control system or remote control	Access control
		Free exit loop
		Key switch
		Remote control

Notes:

1. The Innova gates shall be installed, operated and maintained in accordance with the documents titled 'Sliding Gate Control INOFLEX Operating Instructions – BA-IFX-B-en/04.2009 and 'Cantilevered Sliding Gate INOVA Industry 08/2007'.
2. The Inova gates shall be installed onto flat level topography and mounted into concrete foundations formed in ground offering equivalent attack resistance.
3. The resistance of the access control systems and operating devices used to operate the gates, to "non-mechanical" attack is not covered as it is outside the scope of LPS 1175: Issue 8. Likewise, the approval does not cover possible effects of any susceptibilities relating to the functionality and performance of any access control equipment that may be used to operate the gate. This is because the scope of access control devices and system configurations that may be used with these locking systems is "infinite". It is therefore recommended that specifiers and installers satisfy themselves that the components used are either resistant to mechanical and other forms of tampering / abuse, or that they are suitably protected from such tampering / abuse and are resistant to any environmental conditions / interference that may cause the locking system to disengage. The access control system must have a minimum of 5000 effective codes.
